

LEATHER BAG for AGFA ISORETTE

Characteristics and functions

Agfa leather case with hand strap, marked Agfa for use with folding cameras for mod.120 film (6x6cm images).

The bag is presented in a horizontal orientation, is composed of two parts. The upper part bears the Agfa marking inserted in a rhombus and the tongue with automatic closure.

The lower part holds the strap for transport in 4 leather loops and is provided with a screw on the bottom, to fix the camera. On the back of the bag there are two large holes located at the two windows of the back of the camera that are used for viewing the numbering of the film. The maximum length of the strap is about 58 centimeters.
