

FERRANIA 8mm ADESIVE TAPE SPLICER

Serial Nr.: -

Characteristic and Functions

8mm film splicer.

Use 12-13mm wide transparent adhesive tape.

The film is aligned by means of the cutter and the tape is punched at the holes in the film. At this point it is sufficient to fold the part of adhesive tape on the side of the film support, making sure that the puncture coincides with that of the film. Can also be used with a film equipped with a magnetic track for sound. Complete with plastic box and instruction booklet in 5 languages.

Weight 270g. Dimensions: 15,5x12x4,8cm.
