

# HANIMEX IC 1300

## 1995

Matricola n. -

### Caratteristiche e funzioni

The Hanimex IC 1300 is a compact camera with minimal performance. In only 111 grams of weight are enclosed all the elements to make good photographs; provided you know the limits of this camera. The lens consists of just two plastic elements, the shutter speed is just that, the lens is not very bright ... But the camera is equipped with an electronic flash that can be activated intentionally, complete with an 'anti-red-eye' system, wrist strap for easy transport and built-in lens cover. There is also a light signal (red) indicating: insufficient light, use the flash and the window for direct viewing of the film used charger.

The equipment is completed by the bag, the wrist strap, the instruction sheet in English, the Hanimex International Guarantee Certificate and the completely anonymous cardboard box.

Weight and measures: 111g., Complete with wrist strap, film and battery excluded. Length 118mm, height 63mm, thickness 37mm.
