## S/8mm Auto Butt-Splicer

Serial Nr.: -

### Characteristics e functions

Splicer for S8mm film. Made in U.S.A. (Patent No. 2,923,195)

Use perforated adhesive cells.

The film is aligned by means of the cutter and the die-cut adhesive is applied to the film using the hole guides. At this point it is sufficient to fold the part of the adhesive on the opposite side of the film, making sure that the drilling coincides with that of the film. Can also be used with a film equipped with a magnetic track for sound. Complete with cardboard box and instruction sheet.

Weight: 243g. Dimensions: 110x87x28mm.
