

# LEATHER CASE for WELTA PERLE

## **Characteristics and functions**

Leather case with strap for transport by hand, not marked, for use with folding film cameras mod.120.

The bag has a vertical orientation; the inside is covered in red velvet. The maximum length of the strap is about 13.78 inches. Adjustment is possible using one of the three holes: this allows a maximum shortening of 2.36 inches. On the front side of the bag there is the closing / opening system (with lock). To open the case you have to slide down the metal ring that surrounds the lock, thus releasing the metal frame of the mobile part of the bag.
