

PHILIPS P32GTC

Electronic Flash

Serial Nr.:B9598

Characteristics and functions

Electronic "Flashlight", guide number 32 (for 100/21 ° ISO film).

The Philips P32GTC works with automatic or manual control.

In automatic mode it is possible to choose between three apertures f/2.8, f/5.6, f/11 which allow fields of use for distances, respectively of:

- Red Field 5-39ft.
- Green Field 3.3-20ft.
- Yellow Field 3.3-10ft.

The duration of the flash has a variable time from 1/750 "to 1/30000".

In manual mode the flash works at 1/750 of a second with a recharge time of approximately 8 seconds.

To save energy you can use the half power or even the power reduced to a quarter (G.N.16 or G.N.8) so that you can use the P32GTC with motorized cameras.

Accessories are the connection cable, the bracket for attachment to the camera, the diffuser for use with 28mm focal length lenses. and 3 colored filters 'green', 'red', 'yellow'.

Power is supplied by four 1.5V AA batteries.

Weight 330g. (Batteries, synchro-flash cable and bracket excluded).

Height 195mm. Width 85mm. Depth 60mm.
