

ACTION man Scorpion Tank

Your Action Man Scorpion Tank is based on the actual fighting vehicle used by today's British Army. To make your model look even more authentic, decorate it with the accessories enclosed. Follow these instructions carefully:

REGIMENTAL PENNANTS

These should be positioned at the top of each grey aerial mast as shown.

1. Push on black aerial cap.

2. Peel off one pennant carefully and stick to top of mast

3. Stick points together

4. Stick flat.

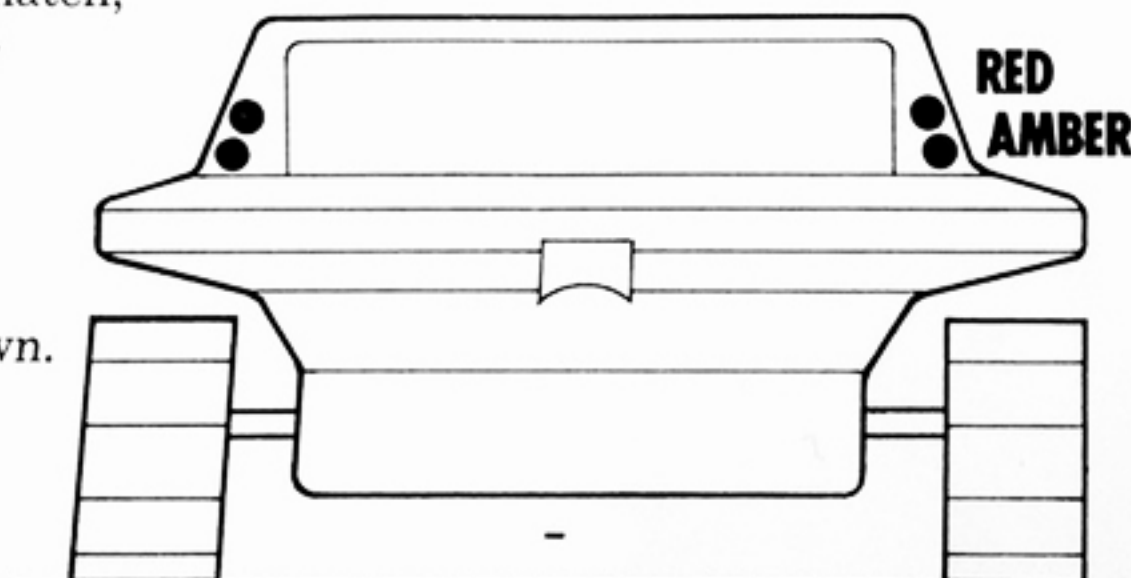

Repeat for second aerial mast, and then position each mast in the holes provided at the rear of the gun turret.

REGIMENTAL BADGES

Fit one in front of driver's hatch, the other beneath rear of turret (side opposite exhaust).

SIDE-LIGHTS

Fit red above amber as shown.

TRACKS

The tracks are not designed to be removed and we strongly recommend that you do not attempt to uncouple the links. In the event of a section of track coming apart, please write to the Sales Service Department, Palitoy Ltd, Owen Street, Coalville, Leicestershire.
