Minolta Autopak™ 500

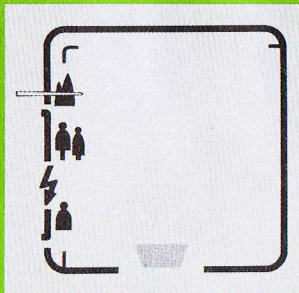

- 126 SIZE INSTANT-LOAD CARTRIDGE CAMERA
- COMPLETELY AUTOMATIC FLASHCUBE OPERATION
 - FULLY AUTOMATIC ELECTRIC EYE
 - BRILLIANT ROKKOR ALL-GLASS LENS

DROP-IN LOADING WITH 126 SIZE CARTRIDGES

The Minolta Autopak 500 loads in an instant with 126 drop-in film cartridges for color transparencies or color or black-and-white prints. These fumble-free cartridges eliminate threading and rewinding. Inserting cartridge automatically sets the camera for all films from ASA 64 to 160.

FOOLPROOF VIEWFINDER . . . SIMPLIFIED ZONE FOCUSING

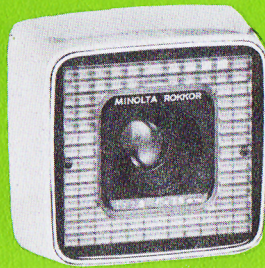

Symbols in viewfinder permit accurate, easy focusing. Just set indicator at symbol for close-up, normal or distant photography and pictures will be automatically sharp (from 3.3 feet to infinity). Viewfinder is tinted for easier viewing . . . and extra large for easy viewing, even with eyeglasses. Has bright frame lines to show actual exposure area in normal and close-up pictures.

EXCLUSIVE AUTOMATIC FLASHCUBE OPERATION

Flashcube operation is completely automatic with the Minolta Autopak 500. Leave a flashcube on the camera at all times . . . it fires automatically only when light is too dim for daylight photography. In case you forget the flashcube, a red warning light reminds you when flash is needed. Four-shot flashcubes rotate automatically after each flash exposure.

ELECTRIC EYE SURROUNDS ROKKOR LENS

The Minolta Autopak 500 has a precision-ground 4-element Rokkor lens. This 38mm f/2.8 all-glass lens assures you of razor-sharp snapshots and slides. The lens-surrounding electric eye gives you perfect exposures . . . every time . . . automatically sets shutter speed for flash (1/40th sec.) or daylight (1/90th sec.) photography.

Minolta Autopak 500

world's first instant-loading camera with automatic flashcube operation

The remarkable Minolta Autopak 500 won't let you make a mistake . . . even with flash pictures! It's that automatic. And the smallest details in your slides and snapshots will be razor-sharp . . . colors beautifully lifelike . . . thanks to its superb Rokkor all-glass lens.
