

## Other features and names of parts

**Self-timer**  
The Riva AF35's self-timer provides a 10-second shutter-release delay that lets you get into the picture.

**Shutter-release button**

**Frame counter**

**Autofocus windows**

**Meter cell**

**Flash**

**Viewfinder window**

**Built-in lens cover**  
When the Riva AF35 is switched off, the camera's lens is automatically protected by a built-in lens cover.

**Optional case**

## Batteries

Two AA alkaline batteries or two AA Ni-Cd batteries provide power for all camera operations.

## Easy Loading

Film handling operations are completely automatic with the Riva AF35. Simply position the film cartridge and leader, then close the camera back. The film automatically advances to the first frame, and every following frame as you shoot. After the last exposure, the camera immediately rewinds the film. And, with DX-coded film, the Riva AF35 automatically sets the correct film speed for you too.

## Specifications

**Lens:** 35mm f/4.5 lens  
**Focusing:** Infrared active-type autofocus; range: 0.95m—infinity  
**Exposure system:** Programmed automatic exposure; subject-weighted metering; range at ISO 100: EV 9.6—16.2  
**Flash system:** Automatic switch-over flash; shutter locks during flash charge  
**Flash recycling:** 3.6 sec. with alkaline cells, 3.0 sec. with Ni-Cd cells  
**Film-speed range:** ISO 100 to 1000 for DX-coded negative film; (ISO 100 or 400 for DX-coded slide film); ISO 100 set for films without DX coding  
**Viewfinder signals:** Green indicator lamp  
**Film transport:** Auto threading, auto advance to the first frame, auto winding, auto rewind and auto rewind stop  
**Self-timer:** Self-timer with 10-second delay; operation indicated by light on front of camera  
**Power:** Two AA-size 1.5-volt alkaline, or two AA size 1.2-volt Ni-Cd cells  
**Battery performance:** Alkaline cells: 23 rolls, Ni-Cd cells: 12 rolls (Based on Minolta's standard test method, using 24 exposure film with flash on 50% of exposures)  
**Dimensions:** 136 x 72 x 47.5mm  
**Weight:** 225g (without batteries)

Specifications subject to change without notice.

# Taking pictures is simply more fun with the easy-to-handle Riva AF35.

With the new Riva AF35, every picture you take is automatically focused and exposed without a single mistake. So all your photographs have the sharpest, clearest details possible. The most brilliant, true-to-life colors. All you do is point and shoot. The compact Riva AF35 does the rest.

## Autofocus

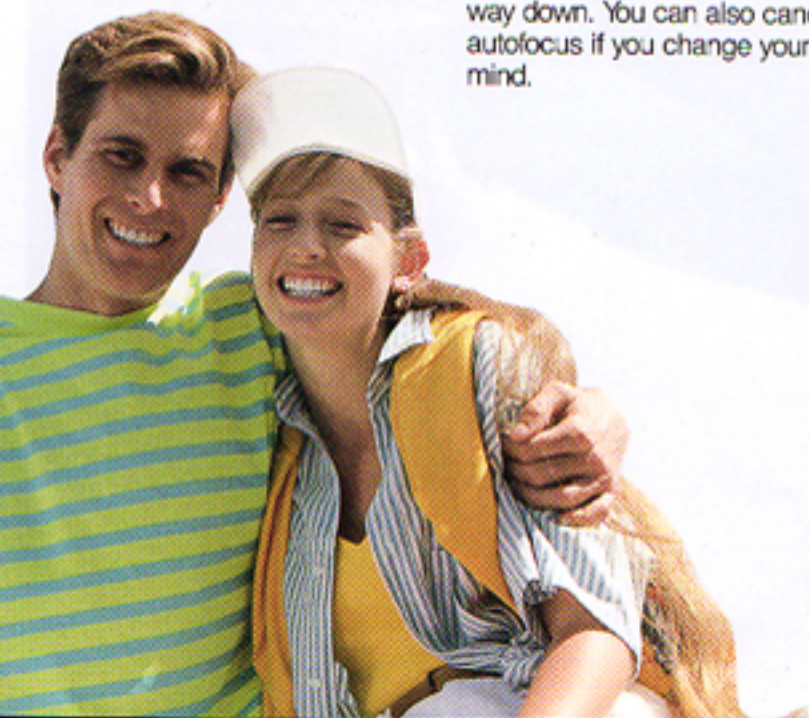

### Precise Autofocus

The Riva AF35's precise autofocus system makes it easy to capture all the special moments in your life just by pushing a button. Simply locate your subject in the viewfinder's autofocus zone, and press the shutter-release button. That's all there is to it. And the Riva AF35 keeps subjects precisely focused from 95 cm to infinity, even in the dark. So all your pictures will have the sharpest details possible.

### Focus Hold

When you want to take a photograph of two or more subjects, simply position the autofocus zone on one subject and press the shutter-release button part way down to lock the focus. Then, recompose your shot and press the button all the way down. You can also cancel autofocus if you change your mind.

## Autoexposure

With conventional metering

### Advanced Autoexposure

The Riva AF35 provides the correct exposure for every picture you take with no manual settings or adjustments to make. Its subject-weighted metering emphasizes the center of the frame, right where your main subject appears for focusing. So even back-lit or spot-lit subjects, like those standing in front of a window or under the shade of a tree, will be properly exposed.

## Automatic Flash

### Automatic Switch-over Flash

Your flash worries are over with the Riva AF35 because its automatic switch-over flash fires whenever flash is needed. After you take a picture, the camera's shutter locks until the flash recycles. Then, in less than 4 seconds, the Riva AF35 is completely ready for your next flash picture.
