

PRAKTICA AND LEICA MOUNT ADAPTERS FOR MINOLTA SLR CAMERAS

These lens-mount adapters make it possible to use lenses having Praktica and Leica mounts on Minolta single-lens reflexes equipped with the exclusive Minolta SLR bayonet mount.

Any Praktica-mount lens mounted in this way can be focused throughout its full range. Leica-mount lenses can be used only for close-ups and copying, since their "back focus" distance is different from that of Minolta SLR's.

To Install

1. Align the red dot on the adapter with that on the Minolta SLR bayonet mount and insert the adapter in the mount.
2. Insert the two small projections on the fitting key into the holes in the adapter and turn it clockwise as far as it will go until it locks into place with a click.
3. Screw the lens all the way into the adapter. (Alternatively, the lens may be screwed into the adapter first, in which case lens mounting procedure will be exactly the same as for Rokkor interchangeable lenses.)

To Remove

1. Unscrew the lens from the adapter.
2. Insert the two small projections on the key into the adapter's holes and, while pushing the lens-release button, turn the adapter counterclockwise until it can be lifted out of the mount.
