

# MINOLTA BLOWER

## for Mini 35II Slide Projector

Serial Nr. no  
Minolta Code: 8516-100

### Characteristics and Functions

All Minolta Mini Projector are made without forced ventilation for cooling. The Minolta Blower allows you to cool both the device and the slide, thus increasing the time of the projections. A spring system is positioned at the front which allows the two feet to be raised by tilting upwards as a whole "Blower-Projector". This appliance, manufactured for the U.S.A. it can be used with a voltage of 110v. On the rear side, not visible in the image, there are the satin-finish metal knob, ribbed, to operate the coupling system that makes the projector and fan perfectly integral and the 110v socket that allows you to directly power the Mini Projector.

Weight 790g. Length 158mm. Max width 90mm. Height 70mm.
