

# MINOLTA CABLE EX

Serial Nr. no  
Minolta Code 8808-130

## Characteristics and Functions

The Minolta Cable EX is an extension cable designed for use with the Auto Electroflashes of the PX series. The EX cable can be used in the cases indicated in the diagram to connect the Auto Electroflashes of the PX series with various accessories; allows you to maintain TTL control of the flash duration by the Minolta direct exposure metering system which makes the use of the flash easier and more accurate.

To correctly connect the EX cable, align it with the guides, press the parts well against each other and tighten the chromed outer rings. The use of these cables in combination with each other or with OC cables is guaranteed only up to a maximum of six.

The Cable EX can be used to connect the Auto Electroflash CLE to the Minolta CLE.
