

MINOLTA CABLE OC

Serial Nr. no
Minolta Code 8808-100

Characteristics and Functions

The Minolta Cable OC is a remote connection cable between a camera and a Minolta PX series Auto Electroflash. It allows the maintenance of TTL control on the film plane of the flash duration and sufficient exposure signaling. The OC cable can be used in combination with the EX cable in the cases indicated in the diagram to connect the Auto Electroflashes of the PX series to the cameras. The OC cable makes using the flash easier and more accurate.

To correctly connect the OC cable, align it with the guides, press the parts well against each other and tighten the chromed outer rings. The use of this cable in combination with EX cables is guaranteed only up to a maximum of six. The Cable OC can be used to connect the Auto Electroflash CLE to the Minolta CLE.
