

# MINOLTA CASE for FLASH METER II

Serial Nr. no.  
Minolta Code n.c.

## Characteristics and Functions

This case is made of black leather with a drawstring closure. The interior is finished with a hazelnut-colored corduroy fabric that adds additional softness and improves the protection of the Flash Meter II. This case has an internal pocket for carrying an accessory such as the Minolta Reflected Light Attachment. The word "minolta" is engraved on the front, while the word "Japan" is engraved on the back. The pad is reinforced with cardboard sewn inside the inner lining which allows greater rigidity and which gives a rectangular shape to the pad itself.

Weight 50g. Approximate measurements: width 90mm. height 190mm. thickness 70mm.
