

MINOLTA CASE for HI-MATIC AF 2M

Serial Nr. no
Minolta Code: unknown

Characteristics and Functions

This bag is made of black leatherette. The case features a zipper located along the bottom, and two snap tabs: a small one on the left and a much wider one along the right side. The shoulder strap can be passed through the openings left free by the tabs; you can therefore use the camera without having to completely separate the case and shoulder strap. On the front we find the writing "MINOLTA" with the Rising Sun in the "O" silk-screened in silver. On the back there is the wording "Japan", hot stamped. The upper part of the case, perfectly flat, remains taut due to the presence of a reinforcement, sewn internally, which has such a conformation as to be able to house the shutter button inside. This is to prevent accidental shots when the camera is still in the case! The inside of the bag is lined with black velvet.

Weight 80g. Width 155mm. Height 92mm. Depth 68mm.
