

# **MINOLTA CASE for XM – XK – X-1 AE (1973)**

Minolta Code 6054-142

## **Characteristics and Functions**

This case is made of dark brown leather with a red velvet interior. The front is detachable by means of the special pin that slides into an asymmetrical slot positioned on the back. On the bottom of the bag there are two holes made in correspondence, one of the release button of the clutch for the recovery of the film without having to remove the camera from the bag, the other is used to observe the selector for storing the type of film used. There is also the camera fixing screw by means of the appropriate nut screw. The "minolta" logo, in golden metal, is placed in the center of the front, while the words "AE" and "MADE IN JAPAN" are hot-engraved on the lower flap of the front of the case. "AE" indicates that this bag-ready configuration can contain the XM body complete with AE viewfinder (in addition to the lens).

Weight 300g. Width 170mm. Height 130mm. Depth 125mm.
