

MINOLTA CREATIVE EXPANSION CARDS (AUTOMATIC PROGRAM SHIFT CARD)

Serial nr. no
Minolta Code: 6927-600

Characteristics and Functions

The Minolta Program Shift Card can be used with the Dynax 8000i and 7000i cameras. This tab allows you to automatically expose a series of 3 frames according to a preset schedule for each of the three. Exposure will always be kept correct and balanced, while shutter speeds and apertures will vary in the combination of fast times - large apertures and slow times - small apertures. Each level involves a variation of one stop from the previous one with changes occurring in opposite directions. The series of 3 consecutive shots starts from the fastest shutter speeds and wider apertures to proceed towards slower shutter speeds and smaller apertures.

Weight about 2 grams. Length 30mm.; width 20mm.; thickness 2mm.
