

MINOLTA CREATIVE EXPANSION CARDS (CLOSEUP CARD)

Serial Nr. no
Minolta Code: 6926-300

Characteristics and Functions

The Minolta Closeup Extension Card was introduced in 1988 and can be used with the Dynax 8000i / 7000i and 5000i cameras. This Exposure Program Extension Card allows you to get the best depth of field in close range and macro photography. The program built into the card automatically adjusts the aperture based on the magnification of the subject and also the shutter speed to thus obtain a correct exposure with any aperture. Using this card in combination with the AF 1200N flash it is possible, for the latter, to work in Program.

Weight about 2 grams. Length 30mm.; width 20mm.; thickness 2mm.
