

# MINOLTA CREATIVE EXPANSION CARDS (CUSTOMIZED FUNCION CARD)

Serial Nr. no  
Minolta Code: 6928-100

## Characteristics and Functions

The Minolta Customized Function Card can be used with Dynax 8000i / 7000i cameras. This program expansion card allows you to program some camera functions according to the photographer's personal needs.

The following functions can be changed:

- 1** Methods of exposure. You can choose which exposure modes to keep active on the camera and which to exclude.
- 2** Active focus lock with Zoom AF 100-200 f / 4.5-5.6 and 70-210 f / 3.5-4.5 lenses. Or you can opt for focusing on the central area or continuous Autofocus.
- 3** Variation of 1EV or ½ EV in manual M or time priority S mode.
- 4** Setting or muting the beep at slow shutter speeds.

**5** Setting the frame counter of additive type or with display, on the indicator panel, of the missing frames.

**6** The start of film rewinding can be set with manual or fully automatic start.

**7** You can choose whether, after rewinding the film, to let the tab stay out of the magazine or not.

All these settings are transferred to the camera's memory circuits, so after changing the settings, the card can be removed and replaced by others.

Weight about 2 grams. Length 30mm .; width 20mm .; thickness 2mm.
