## Characteristics and Functions

The Minolta Sports Action Card-2 can be used with the Dynax 9xi / 7xi / 5xi and Dynax 8000i / 7000i / 5000i cameras. It favors the photography of fast moving subjects by using fast shutter speeds to freeze the subject, while introducing large apertures that allow you to isolate the subject against a blurred background. With the Dynax 9xi, 7xi and 5xi cameras, the Advanced Program Zoom (APZ) program is activated which allows you to obtain the same apparent size of the subject in the frame by automatically changing the focal length.

Weight about 2 grams. Length 30mm.; width 20mm.; thickness 2mm.
