

# MINOLTA CREATIVE EXPANSION CARDS (TRAVEL CARD)

Serial Nr. no  
Minolta Code: 6932-110

## Characteristics and functions

The Minolta Travel Card automatically sets an aperture to ensure a good depth of field, as wide as possible, suitable for travel photographs where it is desirable to have many subjects all in focus on various planes. The Travel Card can be used with Dynax 7xi, Dynax 8000i, 7000i, 5000i cameras. Particular attention should be paid to using the Dynax 7xi as the card modifies the standard ASZ program. If a movement of the subject or the camera is detected, the program will set a faster time to freeze the subject, then to compensate for the exposure a wider aperture will be set, affecting the possibility of obtaining a large depth of field.

Weight about 2 grams. Length 30mm.; width 20mm.; thickness 2mm.
