

MINOLTA

CREATIVE FILTER SET

for AF-E / FS-E & Freedom I / II
1987

Serial Nr. no.
Minolta Code: 6714-581

Characteristics and Functions

With these filters it is possible to produce creative effects: of a bright spot, in the shot scene, you get a dilated effect like a star (Normal Filter), with the possibility of amplifying the effect by adding four (Cross Filter) or six (Snow Cross Filter) rays of light as seen in the three examples. These filters are applied to the frame of the front shell of the camera by pressing lightly on the sides of the black frame of the filter itself. Weight of each single filter: 2g. Dimensions of each single filter: length 24mm., Height 20.5mm., Thickness 3mm.
