

MINOLTA

DATA BACK – DB-5

1989

Serial Nr. no
Minolta Code: 8766-400

Characteristics and Functions

The Minolta Data Back DB-5 is dedicated to the Dynax 5000i. Replacing the standard back with the DB-5 Data Back is really simple: simply open the back, move the small zip lever downwards and remove the back itself from the upper ring. With the reverse operation, the DB-5 is easily installed.

The spine prints the date or time in the lower right corner of the negative, has the automatic calendar and the quartz clock. The exposure of the data to be engraved on the negative is automatically calculated by the DB-5 according to the sensitivity of the film used. The data print function can be canceled.

With the MODE button you can choose the data setting according to the sequence: "Year, Month, Day"> "Hours, Minutes, Seconds"> "no data"> "Month, Day, Year"> "Day, Month, Year".

With the SELECT button you select the data you want to modify.

With the ADJUST button you have the increased variation of the data. By keeping the button pressed, the figures increase rapidly.

A black bar, located in the upper right corner of the display, pulses for two seconds to indicate that the data has been printed on the film.

Powered by a 3v battery type CR 2025 or equivalent.

Weight 59g., Battery excluded.

Dimensions: length 148mm; height 60mm .; thickness 20mm.
