

MINOLTA ND 4X FILTER

for Minolta RF 500mm. f.1:8

Serial Nr. no
Minolta Code unknown

Characteristics and Functions

This "ND 4X" filter is one of the four supplied with the 500mm reflex lens. Minolta's Manualfocus series; it must be applied on the back using the supplied key. The Minolta ND 4X Filter allows you to lower the amount of light arriving on the film by 2 diaphragms without altering the colors, very useful in the presence of strong lighting, especially with this lens without an adjustable diaphragm. Black frame with "MINOLTA" logo in block letters.

Weight 8g. External diameter of the frame 39mm.; thickness 9mm.
