

MINOLTA R 60 AC FILTER

d.55mm.

Serial Nr. no
Minolta Code: 7255-313

Characteristics and Functions

The filters of the AC series - Achromatic Coating - are filters that have an anti-reflective surface treatment like the lenses, for a better performance. The Minolta R 60 AC Filter is indicated in black and white photography: it has a very marked effect, it allows you to darken the sky and makes the clouds dramatic and stormy, increasing their effects compared to the orange filters. Virtually the red filter lightens all red and orange colored objects while darkening all complementary colored ones. Black frame with "MINOLTA" logo in block letters.

Weight 18g. Frame outer diameter 57mm; thickness 6mm.
