

# MINOLTA R 60 FILTER

## for Minolta RF 500mm. f.1:8

Serial Nr. no  
Minolta Code unknown

### Characteristics and Functions

This "R 60" filter is one of the four supplied with the 500mm reflex lens. Minolta's Manualfocus series; it must be applied on the back using the supplied key. The Minolta R 60 Filter is indicated in black and white photography: it has a very marked effect, it allows you to darken the sky and makes the clouds dramatic and stormy, increasing their effects compared to the orange filters. Virtually the red filter lightens all red and orange colored objects while darkening all complementary colored ones. Black frame with "MINOLTA" logo in block letters.

Weight 8g. External diameter of the frame 39mm.; thickness 9mm.
