

MINOLTA LENS CAP

for MC-MD Rokkor Lenses

Serial Nr.: no
Minolta Code 7351-210

Characteristics and functions

This black flexible plastic cap with "minolta" written in relief in the center, in the part worked with a texture that imitates the skin of the cameras, accompanies the MC and MD Rokkor lenses produced since 1973. The press-on type application is guaranteed by 16 small ridges along the inner edge contrasted by 8 arched sectors. This cap can be combined with lenses with external mount of d.51mm. (filter attachment d.49 mm).

Weight 6g. Dimensions: diameter 56mm .; thickness 8mm.
