

MINOLTA LENS CAP

for Super Rokkor Lenses

Serial Nr. no
Minolta Code: unknown

Characteristics and Functions

This satin aluminum-colored metal cap can be used with interchangeable lenses for Minolta 35 cameras produced in the years between the late 1940s and early 1950s. It is applied by pressure on the lens mount. Inside there is a thin black velvet gasket that helps lock the cap in place on the lens mount. Can be used on frames with an external diameter of 36mm. Weight 6g. Dimensions: diameter 39mm.; thickness 6.5mm.
