

# MINOLTA

## MICROSCOPE ADAPTER II

(New Logo)  
1981

Serial Nr. no  
Minolta Code: 8331

### Characteristics and Functions

The Microscope Adapter II allows you to use Minolta's Manualfocus SLR cameras in microscope photography.

The adapter consists of 4 parts: a chrome-plated ring with a Minolta bayonet to be inserted into the camera optics port, a barrel, a connection mount to be inserted into the microscope eyepiece mount which is then firmly fixed to the barrel of the camera. Microscope Adapter by means of the ribbed screw on the side (to the right of the barrel in the image), and a cylindrical accessory to be used as a lens hood by inserting it into the lower mount of the adapter and then into the eyepiece mount of the microscope. The Microscope Adapter II, which bears the new Minolta logo engraved with the rising sun in the "O", has the terminal part of the connecting frame black instead of chromed as in the version with the old logo. Also the weight in this case has decreased from the previous 217 to the current 173 gr.

Weight 173g. Dimensions: length 135mm., Maximum body diameter 49.5mm. (excluding locking screw).
