

MINOLTA MINI 35

Slide Projector with Autochanger

Serial Nr. 1350505
Minolta Code: 0351

Characteristics and Functions

Minolta produces countless accessories for 35mm film cameras. Among these, the "Mini 35" Slide Projector, which is used for single projection of 35mm slides, enters the catalog in 1956. mounted on 5x5cm frames. With the particular accessory included in this kit, you can instead load numerous slides into the right basket of the Minolta Autochanger, move them to the projection position and download them into the receiver basket of the Autochanger just with the touch of a lever! The device has a solid and accurate construction in biscuit-colored metal whose painting produces a wrinkling effect while internally it is satin black; the other parts are in chromed steel, while the Minolta Autochanger is painted in satin black. To bring the projector into the position of use, press the two circular steel buttons located laterally in the front position and lift / rotate the shell. The lamp compartment has no cover to allow for better ventilation. Then place the slide holder or the automatic loader, insert the slide and, with the lamp on, focus by rotating the external lens mount. The lens is a P-Rokkor 2.5 / 75mm. On the automatic slide loader we find the slider for moving the slides

that ends on the right with a small ivory-colored plastic handle. In the two slide compartments there are two slide presses which, aided by a spring, hold the slides mounted on 5x5 frames on the bottom of the Autochanger. The pack of slides to be projected must be inserted in the right compartment, which we will find in the left compartment at the end of the projection. Here too there are two small ivory-colored plastic handles that help grip. In the lower part there is the mount with thread to fix the "Mini 35" to a tripod, a steel plate that shows in red: "110 Volts"; "AC DC"; Max 100 Watts ". There are 4 feet of which the front ones are adjustable. This Minolta Mini 35 Slide Projector complete with Autochanger can be transported in an elegant wooden case covered externally with gray adhesive paper with gold silk-screened "Mini Slide Projector Kit" "Minolta (with Logo)" "Japan". The interior is yellow.
