

MINOLTA PANEL SET for 360PX, 320X, 320 1981

Serial Nr. no
Minolta Code 8805-595

Characteristics and Functions

The Minolta Panel Set allows the use of colored filters (yellow, green, red, blue), conversion filters (85B and ND2X) and panels for the variation of the flash coverage angle (W1- angle of view equal to $f. = 28\text{mm.}$, W2- field angle equal to $f. = 24\text{mm.}$, T with field angle equal to $f. = 100\text{mm.}$). The support frame, in black plastic and rectangular in shape, allows you to insert the filters in the first and the panels in the second through two slots on the right side, so that they can be used individually or in combination. The filter holder must be adapted in front of the dish using the same grooves for the use of the W1 panel supplied with the Flashes 360PX, 320X or 320.

Weight 330g. Dimensions: length 10.5mm .; width 7,8mm .; height 11.4mm.
