

MINOLTA QUARTZ DATA BACK – QD-7 1988

Serial Nr. no
Minolta Code: 8767-100

Characteristics and Functions

The Minolta Quartz Data Back QD-7 is dedicated to the Dynax 7000i / 8000i. Replacing the standard back with the Quartz Data Back QD-7 is really simple: just open the back, move the small hinge lever down and remove the back from the top ring. With the reverse operation, the QD-7 is easily installed.

The spine prints the date or time in the lower right corner of the negative, has the automatic calendar and the quartz clock. The exposure of the data to be engraved on the negative is automatically calculated by the QD-7 according to the sensitivity of the film used. The data print function can be canceled.

With the MODE button you can choose the data setting according to the sequence: "Year, Month, Day"> "Hours, Minutes, Seconds"> "no data"> "Month, Day, Year"> "Day, Month, Year".

With the SELECT button you select the data you want to modify.

With the ADJUST button you have the increased variation of the data. By keeping the button pressed, the figures increase rapidly.

A black bar, located in the upper right corner of the display, pulses for two seconds to indicate that the data has been printed on the film.

Powered by a 3v battery type CR 2025 or equivalent.

Weight 65g., Battery excluded.

Dimensions: length 145mm .; height 58mm .; thickness 20mm
