

MINOLTA REAR CAP

for Vectis V Lenses

Serial Nr.: no
Minolta Code unknown

Characteristics and functions

This Lens Rear Cap LR-V1 in translucent plastic is adaptable to Minolta Vectis lenses V. Vectis identifies, for Minolta, the products of the APS system. This cap is applied to the lens bayonet by making any of the three references ending in an "arrow" coincide with the red hemisphere of the lens, then turning it clockwise until it locks. The edge is lined to make it easier to grip. In the center of the smooth circular part the Minolta Logo is placed in relief with the rising sun in the "O". Made in Japan. Weight 8g. Diameter: 63mm. Thickness 12mm.
