

MINOLTA SPORTSFINDER

for Weathermatic 35DL

Serial Nr. no
Minolta Code: 8232-100

Characteristics and Functions

This accessory dedicated to the Minolta Weathermatic 35DL was presented in 1987 at the same time as the camera. It facilitates underwater shooting when, with the mask on, it is impossible to get close to the eyepiece. It is applied by means of the rear loop and the front elastic that is fixed to the black plastic frame of the loop after having applied it around the lens casing. The double rear frame allows you to evaluate the frame with the lens set to two focal lengths - the small central one is used for the 50mm frame. To load and unload the camera it is essential to remove the Sportsfinder
Weight 50g. Dimensions: width 76 mm.; length 147mm.; thickness 44mm.
