

MINOLTA SPORTSFINDER

for Weathermatic-A

Serial Nr. no
Minolta Code: 6268-240

Characteristics and Functions

This accessory dedicated to the Minolta Weathermatic-A was presented in 1980 at the same time as the camera. It facilitates underwater shooting when, with the mask on, it is impossible to get close to the eyepiece. It is applied by means of the rigid mount astride the rear part of the camera by making the two opposite arrows coincide (yellow on the Weathermatic-A, black on the viewfinder) and tightening the lower screw. To load and unload the camera it is essential to remove the Sportsfinder. Since 1981 it has been marketed with the new Minolta logo with the rising sun in the "O".
Weight 37g. Dimensions: width 47mm.; length 105mm.; thickness 30mm.
