

# MINOLTA

# STRAP BATTERY HOLDER

for 2x S-76

Serial Nr. no  
Minolta Code: unknown

## Characteristics and functions

With the advent of electronic SLRs, it is necessary to always have a source of fresh energy at hand because, in addition to the exposure meters, the shutters are completely enslaved by the efficiency of the batteries - flat batteries, no photos! This is how these small accessories appear to be placed on the shoulder straps in order to have 2 1.5v silver oxide batteries always charged. This specimen, produced before 1981, bears the old "minolta" logo in italics and the words "JAPAN" in block letters.

Weight 1,5g. Dimensions: length 26.5mm.; width 16mm.; height 16mm.
