

MINOLTA VIEW-FINDER CAP (II tipo)

Serial Nr. no
Minolta Code: unknown

Characteristics and Functions

This plastic cap can be used with the X series SLR cameras and with the 1000 series Autofocus SLR cameras (AF 5000, AF 7000, AF 9000) produced since 1985. Some of these SLR bodies, such as the XD-7 / XD -11 and the AF 9000, have already incorporated the viewfinder shutter, therefore they do not require the use of this View-Finder Cap which is applied to the hot shoe on the black plastic frame of the viewfinder eyepiece. A longitudinal orientation through hole with rectangular section allows the cap to be placed on the shoulder strap for transport.

Weight 2g. Dimensions: length 26mm. width 18mm.; thickness 9mm.
