Minolta Code: 0567-100

Inscription on the lens:  
**Minolta Lens Made in Japan MC Tele Rokkor - QD 1:3.5 f=135mm**

This 135mm is the evolution of the previous MC Tele Rokkor - QD 1: 3.5 f = 135mm.  
The only variations in the set-up are given by the position of the aperture ring located near the optics union and by the appearance of the aperture ring now typical of MC Rokkor lenses with concave ribbed parts.  
The optical complex is instead identical to the previous 135mm f. 1: 3.5.  
The 135mm identification codes are orange and are located on the sides of the distance scales.
