

28mm. f.1:2.8 MD Rokkor-X

Production: 1978-1981

Serial Nr.1228012
Minolta Code: 0590-300

Inscription on the lens:

Minolta MD W.Rokkor-X 28mm 1:2.8 Lens Made in Japan Ø49mm

This 28mm. is the latest update of the 28mm f.2.8 MD W. Rokkor in the set up with an optical complex of 7 lenses in 7 groups before the abandonment of the "Rokkor" abbreviation on Minolta lenses. This version, presented in April 1978, is reserved for the US market and Canadian and is distinguished by the presence of the "X" after "Rokkor". The lens has all the typical upgrades of the MD Rokkor series. The anti-reflective coatings on the lenses have been improved. The identification code of the 28mm lens, in orange color, is placed on the right side of the distance scales.

The front cap of this lens is not pressure-fit in flexible plastic, but of a rigid clip-on type which is a prelude to the production of front caps on lenses produced after 1981 with the new Minolta logo in block letters.

Like all the others in the MD series, this lens also has the MC coupling.

Numero lenti Number of lenses	7
Gruppi Groups	7
Angolo di ripresa Field angle	75°
Distanza minima di ripresa Minimum focus distance	0,3 m. / 1 ft.
Accoppiamento diaframma Diaphragm coupling	automatico automatic
Gamma diaframmi Aperture range	2.8 - 22
Dimensioni - diametro x lunghezza in mm. Dimensions: diameter x length (mm.).	64 x 54
Peso - in grammi Weight - in grams	188
Misura attacco filtri - in mm. Filter attachment size (mm.)	49
Colore dei numeri in piedi Color numbering values in feet	verde green
Blocco sul diaframma minimo Lock on the minimum aperture	no
Pulsante stop-down sull'obiettivo Stop-down button on the lens	no
Ghiera di messa a fuoco Focus ring	metallo nero con gomma nera black metal with black rubber
Ghiera dei diaframmi Aperture ring	metallo nero black metal
Supporto della baionetta / baionetta Bayonet mount / bayonet	metallo nero / acciaio inossidabile black metal / stainless steel
Paraluce Lens hood	vite screw
