This lens is the improved version of the MC Rokkor 50mm. f.1: 1.7 in the version for the U.S.A market.

It possesses all the typical upgrades of the MD Rokkor series.

Anti-reflective coatings on the lenses have been improved.

This MD series was also produced in two subseries which are distinguished by the inscriptions on the front of the lens.

In reality, there are 4 variants of this optic: the first two subseries are distinguishable by the 55 mm diameter filter attachment; the second two for the attachment of filters with a diameter of 49 millimeters.

The identification code of the 50mm objective, in orange color, is placed on the right side of the distance scales.

Like all the others in the MD series, this lens also has the MC coupling.
