

18-70mm. f.1:3.5-5.6 Sony Alpha

Production: 2006 - >

Serial Nr.2313934

Inscription on the lens:

DT 3.5-5.6/18-70 0.38m/1.3ft MACRO Ø55

This lens, "Made in China", is part of the first series of Sony Alpha lenses directly derived from Konica-Minolta AF lenses from which it differs in the rubberized finish of the focal ring and the inscriptions on the barrel. The small, ruled focus ring does not have meters and feet scales, so manual focus is not possible in estimating the shooting distance. In the center are the indications "3.5-5.6/18-70" and on the right "Sony"

The 18-70 is a wide-angle/medium-telephoto zoom lens capable of covering a focal length corresponding to 27-105mm in the 35mm format. Ideal for general shooting, it covers a high percentage of shooting situations. The collimation signal with the lens union ring of the camera consists of a red plastic disc.

Numero lenti Number of lenses	11
Gruppi Groups	9
Angolo di campo con fotocamera APS-C Angle of view with APS-C camera	76° - 23°
Distanza minima di messa a fuoco Minimum focus distance	0,38 m. / 1,3 ft.
Accoppiamento alla fotocamera Pairing to the camera	8 contatti dorati 8 gold-plated contacts
Gamma diaframmi / ghiera diaframmi Aperture range / aperture ring	3.5 (22) – 36 / no
Dimensioni: diametro x lunghezza (mm.) Dimensions: diameter x length (mm.)	66 x 77
Peso - in grammi Weight - in grams	235
Misura attacco filtri (mm.) Filter attachment size (mm.)	55
Colore numerazione valori in piedi Color numbering values in feet	-
Apertura del diaframma Opening the diaphragm	circolare circular
Lamelle del diaframma	7
